

# We are Hiring!

**Position: Java Developer (Rank of Product Engineer/Associate Product Engineer)**

## Vacancy-02

**Job Context:** We are looking for talented, self-motivated person who will be responsible to deliver Software projects/development projects by maintaining set standard within prescribed timeline. Responsibilities include design, development and implement high-volume, low-latency, robust mission critical systems, services or modules running in the largest banks and financial institutions of Bangladesh.

## Job Requirements

- Good grasp on **Java SE** preferably in multi-threading, generics, collections, streams, lambda etc.
- Must have prior experience in developing web-based applications in **JavaEE or Spring**.
- Excellent knowledge on Oracle Database, writing performant SQL and ORM technologies (**JPA/Hibernate**).
- Knowledge on **Oracle PL/SQL** would be an added advantage.
- Strong ability to understand and translate business requirements from customers into good software design using best practices and principles (e.g. **SOLID, OOP** etc.) with proper impact analysis on existing systems wherever applicable.
- A mindset to continuous improvement by learning new skills and techniques, along with reducing technical debt of the existing software systems by refactoring them continuously.
- Ensure the functional aspects of the requirements are fully complied in time by unit testing, and following the set standards and best practices as well.
- Guarantee peer review is done through effective communication and the quality of coding standard as per peer report submitted to Team Lead.
- Take action to meet work-related objectives without being asked. Seeks out and willingly undertakes new challenges, responsibilities or assignments.
- Visible intents to build or maintain friendly, constructive & effective relationships. Relates well to people at all levels and build appropriate rapport with them.

## Employment Status: Full Time

## Educational Requirements

Bachelor's degree in CSE/ICT from any reputed public/ private university.

## Additional Requirements

- Excellent knowledge on problem solving skills is a plus.
- Interest and desire to self-learn the specific business domain in addition to relevant technology to become an impactful developer
- Ability to prioritize, multi-task and follow-up with minimal direction from team-lead
- Attention to detail and organized
- Prior experience in developing software applications in banking or financial sector especially subject knowledge in **Trade Finance** business is preferable.

## Experience Requirements:

At least 2-3 years

## Salary Range

As per pay structure of company. Negotiable for highly experienced & deserving candidates.

## Other benefits

- Weekly Two Holidays
- Life & Hospitalization Insurance Benefit
- Festival Bonus: 2
- Salary Review - Yearly
- Provident Fund & Gratuity
- Leave Encashment
- Worker's Profit Participation Fund (WPPF)
